RUSSIAN ACADEMY OF SCIENCES. IZVESTIYA. MATHEMATICS

Том 57, №№ 1–3, 1993

Volume 42, Numbers 1–3 Pages 1–629

Volume Index of Authors

Ageev, S. M. Topological proofs of Keller's theorem and an equivariant version of it 621

Arov, D. Z. The generalized bitangent Carathéodory-Nevanlinna-Pick problem, and (j, J_0)-inner matrix-valued functions 1

Bondal, A. I. and Polishchuk, A. E. Homological properties of associative algebras: The method of helices 219

Domanskiĭ, E. N. On Maslov regularizability of discontinuous mappings 27

Dragovich [Dragović], V. I. Solutions of the Yang equation with rational irreducible spectral curves 51

Grigoryan, S. A. Generalized meromorphic functions 133

Iskovskikh, V. A., Kabdykairov, F. K., and Tregub, S. L. Relations in the two-dimensional Cremona group over a perfect field 427

Kabdykairov, F. K. See Iskovskikh, V. A.

Karasev, M. V. and Pereskokov, A. V. On connection formulas for the second Painlevé transcendent. Proof of the Miles conjecture, and a quantization rule 501

Khabibullin, B. N. The theorem on the least majorant and its applications. I: Entire and meromorphic functions 115

———, The theorem on the least majorant and its applications. II. Entire and meromorphic functions of finite order 479

Kholshchevnikova, N. N. On sets of uniqueness for series in various systems of functions 149

Kulikov, Vik. S. Alexander polynomials of plane algebraic curves 67

Makhmudov, È. N. and Pshenichnyĭ, B. N. The optimality principle for discrete and differential inclusions of parabolic type with distributed parameters, and duality 299

Mynbaev, K. T. On approximation of integral operators, their kernels, and solutions of Fredholm integral equations of the second kind in connection with an operator of Sturm-Liouville type 173

Nazarov, S. A. Asymptotics of the solution of a boundary value problem in a thin cylinder with nonsmooth lateral surface 183

Oskolkov, V. A. On the basis property of certain polynomial systems in spaces of entire functions of exponential type 587

Paramonov, P. V. On approximation by harmonic polynomials in the C^1-norm on compact sets in $\mathbf{R}^2$ 321
Pereskokov, A. V. See Karasev, M. V.
Polishchuk, A. E. See Bondal, A. I.
Pshenichnyĭ, B. N. See Makhmudov, È. N.
Ryzhikov, V. V. Joinings, intertwining operators, factors, and mixing properties of dynamical systems 91
Shokurov, V. V. Semistable 3-fold flips 371
Sviridyuk, G. A. Quasistationary trajectories of semilinear dynamical equations of Sobolev type 601
Tregub, S. L. See Iskovskikh, V. A.
Tyurin, A. N. Spin polynomial invariants of smooth structures on algebraic surfaces 333
Vdovin, A. M. Extension of a new axiomatic set theory 615
Verbitskiĭ, O. V. On the possibility of performing any multi-prover interactive proof in constantly many rounds 561
Vereshchagin, N. K. Relativizable and nonrelativizable theorems in the polynomial theory of algorithms 261
Zyuzina, S. Yu. Constructibility of exceptional pairs of vector bundles on a quadric 163
